Black Berkey Primer™

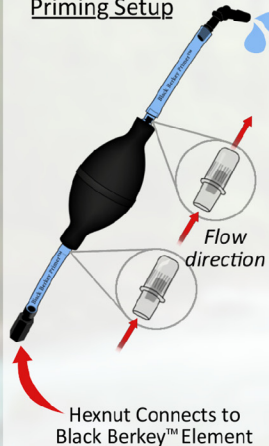

Use to Prime & Purge your Black Berkey™ Elements

Read instructions prior to use.
Failure to read & follow all instructions may result in personal injury and/or void warranty.

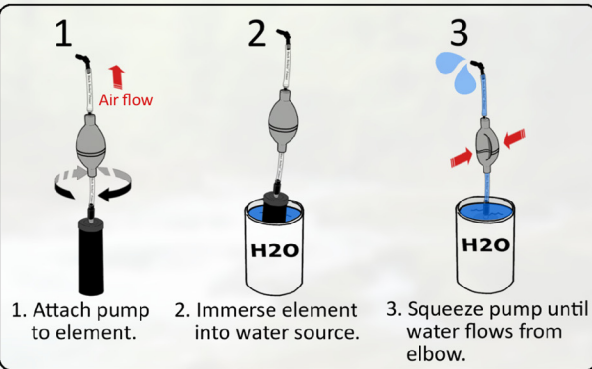

Priming Setup

Direction of the Valves

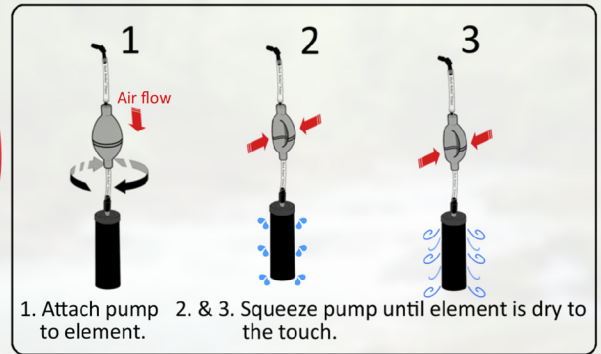

Point both valves in the same direction (keep them in-line).

Priming your Black Berkey™ Elements saturates them with water, maximizing flow for production. For optimal results, prime your Black Berkey™ Elements after purging them.

Purging Setup

Purging your Black Berkey™ Elements expels water and clears filtered contaminants, improving flow & dry time for storage.

Change between Priming & Purging functions by simply removing the black attachments (hexnut & elbow) from the ends of their tubes and switching sides.
